This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. INTRODUCTION

This attempt to bring together the titles of books and pamphlets including a few manuscripts and magazine articles dealing with Williams college, was started in 1907 at the suggestion of Mr. James I. Wyer, to be submitted to the New York State Library School as the bibliographic thesis in partial fulfillment of the requirements for the B.L.S. degree.

The catalogued and uncatalogued material in the Williams College Library forms the basis of the bibliography. It has been examined in detail. The Berkshire Athenæum, Boston Public Library, Library of Congress, Massachusetts Historical Society Library, Massachusetts State Library, New York Public Library and the New York State Library have been searched for additional data. The subject readings under which the material is grouped are those indicated in *Dewey's Decimal Classification* in the section for colleges and universities.

The incompleteness of the collection covered by this bibliography is apparent to no one more than it is to the compiler. But with this very fact in mind it is published that it may serve to indicate to persons seeking such information what printed matter is at hand regarding the various phases of Williams college. But, moreover, it is issued with the sincere hope that the collection will be made more nearly complete and be increased by gifts of publications of all kinds, class and alumni reports and other memorabilia, either in manuscript or in print, relating in any way to the college, its officers, alumni and students. It is intended that all such records shall be carefully preserved and systematically arranged in the College Library, in order that they may be available to the Alumni and to all who are interested in the history and life of the college.

It is a pleasure to acknowledge the kind interest of many persons in this bibliography. To two gentlemen especially I tender my warmest thanks. Mr. Herman Henry Bernard Meyer, Chief Bibliographer of the Library of Congress, has given me several valuable suggestions. My esteemed friend, Dr. Leverett Wilson Spring, D.D., Professor of English Literature, *Emeritus,* in Williams college, has read the manuscript and in this way has brought to my researches the benefit of his life-long studies in the history of Williams college.
